PROGRAMME: MBA ITM/ MIS – 2025/2026

ACADEMIC YEAR 2025/2026

INDIVIDUAL ASSIGNMENT

QUESTION

Develop a research proposal with sections and considerations stipulated below.

SECTIONS AND CONSIDERATIONS TO BE OBSERVED

Among other things, the candidate should observe the following under each section.

1. Abstract (10%)

1.1. Does the abstract exceed 500 words in length?

1.2. Is abstract concise and in a single paragraph, written in a rational and scientific manner for easy understanding?

1.3. Does abstract constitute the following (in brief)

1.3.1. Practical, scientific, theoretical or artistic gap the research/project is filling
(Motivation/problem statement)

1.3.2. Very brief but clear methods/procedure/approach

2. Introduction (25 %)

2.1. Is the background relevant presented, discussed and explained well from global, regional and local contexts ?

2.2. Any policy/genuine report cited?

2.3. Is the main problem and sub problems well-articulated?

2.4. How clear are the objectives of the proposed research? Are they linked to main and sub problems?

2.5. Are the research questions and/or hypotheses clearly formulated?

2.6. Does the proposal capture clear relevance/rationale/ justification of the chosen topic?

3. Literature Review (25%)

3.1. Does the proposal include a comprehensive review of (both theoretical and empirical) relevant literature? A candidate should demonstrate deeply impressive command of literature, drawing on an exemplary range of material/evidence and/or examining the topic in considerable detail

3.2. Is there critique of existing literature and is it clearly linked back to the relevance of the chosen topic?

3.3. Is there demonstration of sensitivity to the limits/limitations of evidence? Or is there a description on how the proposed research positions itself within the generic context of the previous studies in the area under investigation?

3.4. Does the candidate demonstrate a systematic understanding of the relevant background theory and knowledge?

3.5. Is the theory been contextualized appropriately within the framework of the research problem in question?

3.6. Is the theory adopted or conceptual framework formulated by researcher explicitly shown?

3.7. Are the variables clearly stated Is it linked to research objectives?

4. Research Plan/Methodology (25%)

- 4.1. Is the methodology adopted and/or design approach clearly described and justified?
- 4.2. Does the proposal demonstrate exemplary sensitivity in the use of quantitative and/or qualitative methods?
- 4.3. Are the data analysis techniques relevant to specific objectives of research?
- 4.4. Is the sampling method and makeup of the sample clearly described?
- 4.5. Are the research tools or data collection methods standard and clearly explained?
- 4.6. Have the issues of validity, reliability and generalizability been addressed?
- 4.7. Is there a clear identification of any limitations, assumptions and constraints which may influence the applied methodology, research design and implementation?

5. Research instruments (15%)

- 5.1. Are the research instruments clearly formulated?
- 5.2. Do the research instruments capture the stated objectives?
- 5.3. Do the variables stipulated in the theory or conceptual framework well captured?
- 5.4. Do the research instruments and the question/guiding items standard and comprehensive?
- 5.5. Do the research instruments relevant to the research methodology?
- 5.6. Do the research instruments valid and reliable?

SUBMISSION DATE: Before or on 25TH DECEMBER 2025
