1.0 INTRODUCTION

1.1 Preliminary Note

These are guidelines for writing proposals, and reports at the Tengeru Institute of Community Development (TICD). The guidelines are meant to act as the point of reference for the candidates of lower courses (NTA Level 4, 5, and 6), Bachelor Degrees (NTA Level 7 and 8) in writing not only their proposals and reports but also their assignments. The guidelines, thus, are meant to assure academic good practices and consistency, taking into consideration the fact that the reports, research projects, dissertations and thesis are part of the requirements for obtaining the aforementioned degrees.

1.2 Definitions

In these guidelines, terms should be construed as herein-under;

Concept Note is an outline of the research proposal of 3 to 5 pages (including references).

Thesis and Dissertation

According to European academic style, a thesis is a focused piece of original research which is performed in order to obtain a PhD while a dissertation is part of a broader post-graduate research report. However, the thesis has evolved since original research nowadays requires plenty of background research. So, a thesis will contain extensive citations and references to earlier work, although the focus remains on the original work that comes out of it.

Preliminaries shall be construed to mean matters before the introduction and which are numbered in *Italics*.

Proposal shall be taken to mean a written presentation of an intended research specifying the problem, the purpose, scope/objective, methodology, references and budget.

Approved proposal is a document which demonstrate ability to research, analyse and use of key skills by undertaking a research study related to his or her field of study.

Field of study means a study programme.

Report shall include research reports. **Research** shall mean a deliberate effort to pursue a problem.

Study shall have the same meaning as research and it includes the phrases intended study and proposed research.

1.3 Purpose and Application of the Guidelines

This guide is intended to help students organize and write a quality research paper and assignments for classes taught in community development profession. Moreover, the guidelines shall be applied by all candidates of TICD and researches undertaken by staff members in TICD.

2.0 GENERAL OVERVIEW

This document contains the official students' research proposal writing guidelines. The guidelines were prepared by Tengeru Institute of Community Development in 2017 and this text includes and refers to the updated version.

Tengeru Institute of Community Development (TICD) through the department of Research and Consultancy (DRC) is committed to work in partnership with NACTE and other organisations and agencies to give students the opportunity to be awarded Diplomas and Degrees.

2.1 REQUIREMENTS

To write a dissertation a student must:

- (a) Pass the appropriate semester examinations; and
- (b) His/her proposal has been accepted or approved.
- (c) Upon fulfilment a and b the student will be eligible to carry out his or her research.

2.2 RESEARCH ETHICS

The TICD through department of Research and Consultancy (DRC) is guided by the following ethical issues concerning research activities:

- encourage originality by employing anti-plagiarisms test.
- Seeking access to data sources through gate keepers and research subjects.
- Autonomy of respondents based on their wish and willing to participate in soliciting data.
- Confidentiality.
- Legal protection of participants' privacy.
- Reporting and publication of research results.
- Benefit of the study to the academic community and to the society.
- Debriefing and/or feedback in appropriate forum.
- Voluntary participation

2.3 Prevailing unethical practices in research

a) Data falsification: This happens when a researcher changes the data obtained from the field so that the research is answered favourably.

- b) Data fabrication: This happens when a researcher makes up the data that was not obtained at all.
- c) Unintentional plagiarism: here a researcher is extensively referencing past works and ends up using too much of the original text from those works.
- d) Intentional plagiarism: where a researcher presents ideas or findings from other published papers as his or her own, instead of citing of those paper.
- e) Harmful conflict interest: eg an organization financing a researcher to conduct a project evaluation and forces the researcher to report only the positive outcomes.

3.0 KEY PARTIES AND ROLES INVOLVED IN MANAGEMENT OF RESEARCH

The purpose of this part is to provide a clear and concise outline on the task each party has to fulfill in the supervision of students' research at TICD.

3.1 Roles of research, consultancy department

The TICD has its own Department of Research and Consultancy (DRC) which, among other things, is dealing with research ethics, research agenda, weighing the benefits and risks of conducting sensitive research including legal aspects of conducting research approval involving human participants.

3.2 Roles of Departments

The role of academic Departments is to provide an enabling environment for students to decide on research topics under the facilitation of the supervisor that are aligned with the TICD Research Agenda, and his/her field of study, to prepare and submit quality and acceptable student researches within the timeframe.

- (a). To monitor the whole process of students progress.
- (b). To allot time frame for supervisors and students to follow in the process of supervision.
- (c). To harmonize the relationship between a student and his/her supervisor.
- (d). To supervisor the timetable issued by the department of research.

3.2 Role and Responsibilities of Supervisors

3.2.1 Roles of the supervisor during research proposal writing

Successful completion of a research report requires a conducive learning environment including close and cordial working relationship between the student and his/her supervisor(s). The supervisor is the agent of the Institute responsible for ensuring that the student's work attains a satisfactory standard and therefore, he/she has the duty to acquaint himself/herself with all the Institute's Regulations and Guidelines governing student's supervision. The following are the roles and responsibilities of the supervisor with respect to supervision of a Diploma and Bachelor's student during the research phase:

- (a) To monitor and ensure that the candidate maintain satisfactory progress throughout the research period by using the following methods to track progress:

- (i) Allocating time for regular consultations between the candidate and the supervisor to discuss the research work. Frequent consultations help to make the supervisor aware of the students' progress on the research work and suggest remedial measures to any problems encountered before it is too late.
 - (ii) The supervisor shall report any problem regarding the progress of the candidates that he/she has failed to handle or address, to the Head of Department for appropriate intervention to be made on time.
- (b) To guide the student in the selection of a researchable problem/topic, formulation of an appropriate research proposal and ensure that the candidate adheres to the regulations and guidelines as required.

3.2.2 Roles of supervisor during research report writing

In order to ensure that the research report prepared by a candidate is of the acceptable quality and standards as specified by the TICD regulations, the supervisors are required to take note of the following:

- (a). Read and/or discuss the candidate's drafts carefully and critically, giving constructive comments on how to improve the report and ensure that the candidate maintains progress within the institute deadlines.
- (b). Review the entire final draft and ensure the report is sufficiently satisfactory for submission and examination.
- (c). Recommend and submit to the Head of the Department.
- (d). Supervisor should encourage face-to-face supervision and other means when needed

4.0 PROCEDURES FOR DEVELOPING DISSERTATION OF STUDENTS

Research proposals are a very useful means of helping students to conceptualize their research project and clarify their areas of focus. A research proposal also ensures that a student has thought through all the potential pitfalls and conducted the essential pre-planning. If done properly, a research proposal should prepare the ground for smooth execution of the student's research. In addition, research proposals serve to convince other people including supervisors that the research that is planned to be undertaken is both important and feasible. Furthermore, it provides a means for a student to convey to others, a message that he/she has critically reviewed the research topic, has selected a suitable method to answer the research questions and that it is feasible for the research project to be completed within the designated time frame. Various formats of research proposals exist.

4.1 Procedure for developing research proposal:

Each Diploma and Bachelor degree candidate shall be required to undertake an independent research on a course relevant to their field of study.

- To develop a research title that relevant to the program of the study
- To follow institute research agenda
- To obtain permission to go for collection of data
- To submit research proposal to the respective department

4.2 Procedure of research findings report

Each Diploma and Bachelor degree candidate shall be required to write a research findings report based on the objectives, data collected and analysis as stipulated in his/her proposal.

4.3 Submission of the research report

Once the supervisor is satisfied that the candidate has satisfactorily incorporated all the recommended corrections, the candidate shall submit in time (as per Institute's Almanac) three spiral bound copies of research report to the supervisor.

5.0 ASSESSMENT OF THE PROPOSALS AND RESEARCH REPORTS

The research reports shall be assessed by the internal and external supervisors based on assessment forms. External examiners (supervisors) will be appointed by TICD and will attend review board meetings. The duties and powers of the external examiners will be in accordance with their rights and responsibilities as laid down for the time being by TICD academic regulations.

5.1 Mode of assessing students research proposals:

TICD's academic departments will assess the students' proposals which will be approved by the institute's examination board. The assessment will comprise of Diploma 50%

- Degree programmes 40%

5.2 Mode of assessing students research reports:

TICD will hold an examination board in collaboration with department to assess the dissertation during the last semester.

- Diploma 50%
- Degree programmes 60%

5.3 Conduct and financing students research:

Conduct research which have community comparative advantages and all research activities by the students will be financed by the students' sponsors.

6.0 FORMAT OF RESEARCH PROPOSAL AND RESEARCH REPORTS

6.1 NTA LEVEL 6

6.1.1 FORMAT FOR RESEARCH PROPOSALS NTA LEVEL 6

PRELIMINARY PAGES:

This subsection includes the following key elements: Cover page, Title page, Table of contents, acronyms and List of illustrations:

CHAPTER ONE: PROBLEM SETTING:

This is the second section forming a research proposal. It is the first chapter that deals with: Introduction, background to the study, statement of the problem, objectives of the study: (main objective, specific objectives), research questions, significance of the study, definition and operationalization of key concepts.

CHAPTER TWO: LITERATURE REVIEW

This chapter will be organised into three major subsections, namely, introductory part, state the theories relating to the study, Survey of previous empirical studies and Research gap.

Survey of previous empirical studies: The candidate at this stage has to undergo serious literature reviewing of relevant sources. This subsection has to be structured in compliance with each specific objective of the study. The student should identify research gap(s) for the study.

CHAPTER THREE: RESEARCH METHODOLOGY:

This is the fourth section that specifically deals with study design, description of area of the study, study population, sample size and sampling procedure, types and sources of data, methods for data collection, methods of data analysis as well as ethical considerations.

REFERENCES AND SUPPLEMENTARY MATERIALS:

The last section of a research report includes references, time-frame (action plan/time table), , instruments applied in the data collection, cover letter. Approval of sub section

6.1.2 FORMAT FOR DIPLOMA RESEARCH REPORT

The guidelines for writing a research report for diploma candidate will be required to have the following items.

I: PRELIMINARY PAGES:

This subsection will contain the following basic element: Cover page, title page, abstract, certification statement, declaration statement and copyright statement, dedication, abbreviations and acronyms, acknowledgements, table of contents, list of illustrations: (list of tables, list of figures, list of appendices).

II: CHAPTER ONE: PROBLEM SETTING:

This chapter will contain background to the study, statement of the problem, objectives of the study: (main objective and specific objectives), research questions, significance of the study, definition and operationalization of key concepts, limitation and scope of the study.

III: CHAPTER TWO: LITERATURE REVIEW

This chapter will be organised into three major subsections, namely, introductory part, state the theories relating to the study, Survey of previous empirical studies and Research gap.

Survey of previous empirical studies: The candidate at this stage has to undergo serious literature reviewing of relevant sources. This subsection has to be structured in compliance with each specific objective of the study. The student should identify research gap(s) for the study.

IV: CHAPTER THREE: RESEARCH METHODOLOGY:

This is the fourth section that specifically deals with study design, description of area of the study, study population, sample size and sampling procedure, types and sources of data, methods for data collection, methods of data analysis as well as ethical considerations.

V: CHAPTER FOUR: DATA PRESENTATION, INTERPRETATION AND DISCUSSION OF FINDINGS:

This section deals only with data by displaying them using various techniques i.e. tables, figures, photos, etc. Interpretation and discussion put the analysed data into scientific perspective. This is a role of every student to establish to explain issues and phenomena based on its own worldview.

VI: CHAPTER FIVE: SUMMARY, CONCLUSIONS AND RECOMMENDATIONS

This section highlights the entire study, draws conclusions per each specific objective of the study, and then give practical recommendations.

VII: REAR PAGES / REFERENCES AND SUPPLEMENTARY MATERIALS

- References (cited works),
- Instruments applied in the data collection
- Other Appendices.

6.2 FORMAT FOR RESEARCH PROPOSAL AND DISSERTATION: - NTA LEVEL 8

6.2.1 FORMAT OF RESEARCH PROPOSAL

In preparing a research proposal for NTA level 8 programmes the candidate will be guided by the following items.

I: PRELIMINARY PAGES (PRELIMINARIES):

This subsection will include the following: Cover page, title page, table of contents, list of illustrations (list of tables, list of figures, list of abbreviations/acronyms, and list of appendices).

II: CHAPTER ONE: PROBLEM SETTING: adopt the NTA 6

This is the second section forming a research proposal. It is the first chapter that deals with: Introduction, background to the study, statement of the problem, objectives of the study: (main objective, specific objectives), research questions/hypothesis, significance of the study, limitation and scope of the study, definition and operationalization of key concepts.

III: CHAPTER TWO: LITERATURE REVIEW

The chapter deals with critical review of previous empirical studies along with explanatory model i.e. theory or set of concepts that enables a researcher to explain the phenomenon under study. It also establishes research gap. It is the section that makes a researcher to link the previous studies with the ongoing initiatives.

IV: CHAPTER THREE: RESEARCH METHODOLOGY

The chapter covers description of area of the study, research design, study population, sample size and sampling procedure, methods for data collection, methods of data analysis, validity and reliability of data and ethical considerations.

V: REAR PAGES/ REFERENCES AND SUPPLEMENTARY MATERIALS

- References,
- Instruments to be applied in the data collection
- Action plan
- Budget

6.2.2 FORMAT FOR WRITING A DISSERTATION

The guidelines for writing a research report at NTA level 8 (Bachelor Degree) will be:

I: PRELIMINARY PAGES:

This subsection will contain the following basic elements: cover page, title page, certification statement, declaration statement and copyright statement, dedication, acknowledgements, abstract, table of contents, list of illustrations (list of tables, list of figures, list of abbreviations and acronyms), and list of appendices.

II: CHAPTER ONE: PROBLEM SETTING

The chapter will cover the background to the study, statement of the problem, objectives of the study (main objective, and specific objectives), research hypotheses and/or research questions, significance of the study, definition and operationalization of key concepts limitation and scope of the study.

III: CHAPTER TWO: LITERATURE REVIEW

This chapter will be organised into two major sub-sections, namely, introductory part, theoretical review, Survey of previous empirical studies and research gap.

- **Introduction:**

This section has to deal with following items:

- (i) First, outline of all sub-sections found in the chapter.
 - (ii) Second, a brief survey of theories that have been applied in the other studies. .
- Survey of previous empirical studies:

The candidate at this stage has to undergo detailed literature reviewing of relevant sources. This subsection has to be structured in compliance with each specific objective of the study. The candidate may identify knowledge gap(s) for each specific objective.

IV: CHAPTER THREE: RESEARCH METHODOLOGY:

The following subsection will be covered description of area of the study, research design, study population, sample size and sampling procedure, methods for data collection, data analysis, validity and reliability of the study and ethical considerations.

V: CHAPTER FOUR: DATA PRESENTATION, INTERPRETATION AND DISCUSSION OF FINDINGS:

This section deals only with data by displaying them using various techniques i.e. tables, figures, photos, etc, interpretation and discussion data. The researcher has also to compare his/her findings with others in discussion.

VI: CHAPTER FIVE: SUMMARY, CONCLUSIONS AND RECOMMENDATIONS:

This section highlights entire study, draws conclusions per each specific objective of the study and then gives both practical recommendations.

VII: REAR PAGES / REFERENCES AND SUPPLEMENTARY MATERIALS:

- References,
- Instruments applied in the data collection
- Other appendices

7. 0 PROCEDURE OF SUBMISSION OF RESEARCH REPORT/DISSERATION

In order to research report or dissertation the student has to follow the following format and writing styles:

7.1 SAMPLE FORMAT OF PROPOSAL

PRELIMINARY PAGES:

Cover page,

Title page

For proposal/dissertations, the title page must be arranged as follows: Title of the dissertation/thesis in capital letters (well-centered); indicate your full name (starting with first name, then second name and last name) and the following statement under your name well centered, symmetrically arranged:

‘A RESEARCH PROPOSAL* (*whichever is applicable) SUBMITTED IN PARTIAL FULFILMENT* OF THE REQUIREMENTS FOR THE DIPLOMA/DEGREE OF (insert name of diploma/degree) OF TENDERU INSTITUTE OF COMMUNITY DEVELOPMENT, ARUSHA, TANZANIA.’ Indicate the year in which the degree is to be awarded by institutions at the bottom.

CERTIFICATION

The undersigned certify that she/he has read and hereby recommends for acceptance by TICD, a research proposal entitled:: A case of, in partial fulfilment of the requirement for the diploma/degree of the TICD.

Signature

.....

(Academic title + Name)

.....

Date

DECLARATION

I, Barakayangu, Mwakasindile, hereby declare that this research report is my own original work and that it has not been presented to any other higher learning institution for similar or any other diploma/degree award.

.....

Signature

Final Draft

COPYRIGHT

This research report is a copyright material protected under WIPO Convention, Berne Convention, Universal Copyright Convention under UNESCO, The Tanzanian Copyright Act of 1999 and other International enactments, in that behalf, on intellectual property. It may not be reproduced by any means, in full or in part, except for short extracts in fair dealing for research or private study, critical scholarly review or discourses with an acknowledgement, without permission of TICD, on behalf of the Author.

Final Draft

DEDICATION

ABBREVIATIONS/ ACRONYMS

- All symbols and prefixes appearing in the main text they should be listed in this section of abbreviations/acronyms along with their full words and should be presented alphabetically.
- Standard units (SI) units should reflect the kind of measurement instruments.
- Where it is wished to use abbreviations of organisations, technical terms etc., spell them out in full the first time they occur, followed by the abbreviation in brackets, e.g. Tengeru Institute of Community Development (TICD);
- In acronyms, degree designations, etc. it is usual to omit full stops, e.g. USA, not U.S.A., TICD not T.I.C.D., FAO not F.A.O.

ACKNOWLEDGEMENTS

- The author has to thank those institutions
- The author has to thank departments, the supervisor(s),
- The author has to thank respondents for the data they solicited etc

Abstract

Table of contents,

List of illustrations

- List of tables,
- List of figures,
- List of abbreviations and acronyms
- List of appendices

8.0 REFERENCES

- a) List all references cited in full at the end of the text, and not as footnotes to the text pages, tables or figures.
- b) The references should be arranged alphabetically by authors. All authors, surnames and initials should be included (i.e. never use *et al.*), followed by the year of publication in parentheses; a full stop, the title of the paper; report; book; etc. (as used in the original document and should not be abbreviated), the journal volume number; the issue number (only if the pagination starts afresh in each issue concerned).
- c) If the reference is to a book, the town of publication, the publisher, the edition number (if not the first) should be added. Journal and book titles should be underlined or italicized.

8.1 Citation in the Text

- a) Cite references by author followed by year of publication. With separating comma, e.g. (Pasape, 2013).
- b) For multiple authorship references cite up to two. For more than two, cite the first mentioned, followed by *et al.*, (meaning “and others” and this should be italic), but these should be cited in full in the lists of references.
- c) Citations in the text should take the following forms:
 - i)have been reported by Machunda *et al.*, (2011).
 - ii) Kalege and Mkumbo (2008) found that
 - iii)other results (Sanga and Gyeke, 2010; Melkizedeki, 2010) have indicated that
 - iv)Revocatus and Park (2009, 2011) found that.... (These are Papers published by the same author in two different years.
 - v)Kileo (2010a, b).... (These are two papers published by the same author in the same year).
- d) d) To refer to personal communications relating to unpublished material, personal communication etc, you should use the example ... (Habiye, M. Personal communication, 2012). These types of references should not be placed in the list of references).
- e) Secondary citations can take the formGwakisa (1997), cited by Magere *et al.* (1999).

8.2 Citation in the List of References

- a) Cite references in alphabetical order of author(s) and in order of year of publication.
- b) For references with same author(s) and year of publication, start with papers by the same author being arranged in the order of (1) single author, (2) two authors alphabetically according to the name of the second author, and (3) several authors chronologically with 2001a, 2000b, etc for papers published in the same year.
- c) References by one author take precedence over references by the same plus additional authors irrespective of the year of publication.
- d) Avoid using Anon or Anonymous where possible. Where no name of an author is given, use the name of the sponsoring or issuing organization, ministry and department etc. if it can be identified.
- e) Separate authors by semi-colons

9.0 RESEARCH REPORT TEXT FORMAT

For the purpose of uniformity and standardization, research proposals and research reports at TICD should follow American Psychological Association (APA)'s citation and referencing styles. The rules of APA styles are detailed in the Publication Manual of APA (see www.apastyle.org).

In addition to APA style, the students should be abided to the following when writing proposals/research report:

1. Paper size: Type text in 1.5 spacing on one side of A-4 size good quality paper (210 x 297mm).
2. Numbering of pages: bottom centred.
3. Wordage: The abstract should not have more than 200 and 250 words for NTA level 6 and NTA level 8 respectively, single spaced.
4. Type style: New Times Romans.
5. Font size 12 1,5 space.
6. Documenting materials or documentation style: APA
7. Footnote:
 - Include footnotes in the text only if their use is unavoidable.
 - Number them consecutively with a superscript number at the relevant author's name or point in the text.
 - Separate them from the text by a line across half the page.
8. Quotations: All quotations must be centred italicized with inverted commas.
9. Italic type style
10. Margins setting/Alignments
11. Pagination: Paginate the preliminaries (portions preceding the introduction) in lower case Roman numerals (i.e. i, ii, iii, etc.) beginning with the title page but should not appear in the title page. Number pages of the body of the thesis in Arabic numbers (1, 2, 3, etc.) consecutively throughout. The page numbers should appear just below the centre of the upper margin.
12. Space/spacing: Leave wide margin
13. The left hand margin must be 4.0 cm from the left edge of the paper, the right hand margin 2.5 cm from the right edge, the top margin 3.0 cm from the top of the page, and the bottom margin 2.5cm from the bottom of the paper.
14. Language used: British English.

15. Title of chapter: Sub titles: Font size 12 and Main Title of the chapter: Font size 14 New times Romans
16. In text abbreviations: Full name followed by abbreviation into brackets.
17. Reference of pronouns i.e. 3rd person singular
18. Sufficient and proper use of punctuation.
19. The whole proposal should be: not more than 20 pages for diploma students and not more than 30 pages for degree students.
20. The research report/dissertation should contain 45-60 pages for diploma students and 50-80 pages for degree students. References and appendices inclusive.

9.1 Order of citation details

The following guidelines and examples are designed to show the main elements that should be cited and the order in which they should appear in references for the three main classes of publication most likely to need inclusion in list of references:

(a) Journals:

Author's name(s) and initials for forenames; Year of publication in brackets; followed by a period/full stop Title of published paper; Name of journal or publication; spelt in full, omitting any definite article (i.e. The) at the beginning, and underlined; or in italics throughout. Volume and/or issue number; First and last page numbers (in full) for journal papers; total number of pages for publications referred to as a whole.

Example: Tarimo, A. J. P. (1997). Physiological response of groundnut to plant population density. *African Crop Science Journal* 5: 267 – 272.

(b) Books:

Author's or editor's name(s) and initials, name of sponsoring or issuing organization or corporate body in the absence of a named individual author or editor; Year of publication in brackets, followed by a period/full stop; Title of book to be underlined or in italics; Name of publisher and town, in that order; Total number of pages in the form: 250pp.

Example: Stocker, L. (2000). *Practical Wildlife Care for Veterinary Nurses, Animal Care Students and Rehabilitators*. Blackwell Science Ltd., Oxford. 288pp.

(c) Individual chapters in multi-authored books:

Author's name(s) and initials; Year of publication in brackets; followed by a period/full stop; Title of chapter or article, followed by the word In; Title of book underlined or in italics; The words "Edited by", followed by the name(s) and initials of the editor(s) of

the publication, underlined and enclosed in brackets; Name of publisher and town, in that order; First and last page numbers of chapter, article, part, or section: pp.18 – 24.

Example: Barrow, E., Gichohi, H. and Infield, M. (2001). The evolution of community conservation policy and Practice in East Africa. In: *African Wildlife and Livelihoods: The Promise and Performance of Community Conservation*. (Edited by Hulme, D. and Murphree, M.) James Currey Ltd, Oxford. pp. 59 – 73.

(d) One page paper in multi-authored books:

Author's name(s) and initials; Year of publication in brackets; followed by a period/full stop; Title of chapter or article, followed by the word In; Title of book underlined or in italics; The words "Edited by", followed by the name(s) and initials of the editor(s) of the publication, underlined and enclosed in brackets; Name of publisher and town, in that order; Page number of the article: p. 250.

Example: Barrow, E., Gichohi, H. and Infield, M. (2001). The evolution of community conservation policy and Practice in East Africa. In: *African Wildlife and Livelihoods: The Promise and Performance of Community Conservation*. (Edited by Hulme, D. and Murphree, M.) James Currey Ltd, Oxford. pp. 59.

(e) Proceedings of conferences/workshop/monographs

Author(s) name(s) and initials; Year in bracket; followed by a period or full stop; Title of article; followed by: In:Title of proceeding or workshop underlined/italics; Name of Editor(s) in brackets; Date of the conference; town; country; Vol. (if any) page numbers (see examples for slight variations: section 18). First and last pages of the article: pp. 180 – 194.

Example 1: Ishengoma, R. C. and Mugasha, A.G. (2000). Trends and accomplishments of research in forestry and nature conservation at SUA 1996 - 2000. In: *Proceedings of the First University-wide Scientific Conference*. (Edited by Matovelo, J. A. et al.). 5 – 7 April 2000, Morogoro Tanzania, pp 28 – 59.

Example 2: United States Agency for International Development (2000). Rice Production in Africa. Agriserve Ltd., New York, 150pp.

(f) Dissertation and Thesis

Author's name and initials, Year in bracket; followed by a full stop, Title of the dissertation, Name of the host institution, First and last pages of the section referred to.

Example: Maskini, M. S. (2000). Spatial and temporal grazing patterns of livestock and wild herbivores at Ngorongoro Conservation Area. Unpublished Dissertation for Award of MSc Degree at Sokoine University of Agriculture, Morogoro, Tanzania. 137pp.

(g) Citing from electronic sources

Author's name, if no author begin with title of the article, Publication date (in brackets), Title of the article, Internet address [in square brackets]. Date of visit to the website.

Example: Kimbrell, A., (May 2002). Fatal Harvest: The tragedy of industrial agriculture. [<http://www.fatalharvest.org/press.htm>] site visited on 9/8/2017.

9.2 Formulae

1. Formulae should be typewritten, if possible leave ample space around the formulae.
2. Subscripts and superscripts should be clear.
3. Greek letters and other non-Latin symbols should be explained in the footnote where they are first used. Take special care to show clearly the difference between zero (0) and the letter O, and between one (1) and the letter l.
4. Give an interpretation of all symbols immediately after the equation in which they are first used.
5. For simple fractions use the solidus (/) instead of a horizontal line, e.g.
 $1p/2m$ rather than $1p \over 2m$
6. Equations should be numbered serially at the right-hand side in parentheses. In general only equations explicitly referred to in the text need be numbered.
7. The use of fractional powers instead of root signs is recommended. Also powers of $\log^e$ are often more conveniently denoted by exponent.
8. Levels of statistical significance which can be mentioned without further explanation are: * $P < 0.05$, ** $P < 0.001$.

9.3 Appendix

1. Tools used to gather the information
2. Permission letter to undertake the research

3. Permission letter obtained from the organization/study area where the research was conducted
